Direct Cost

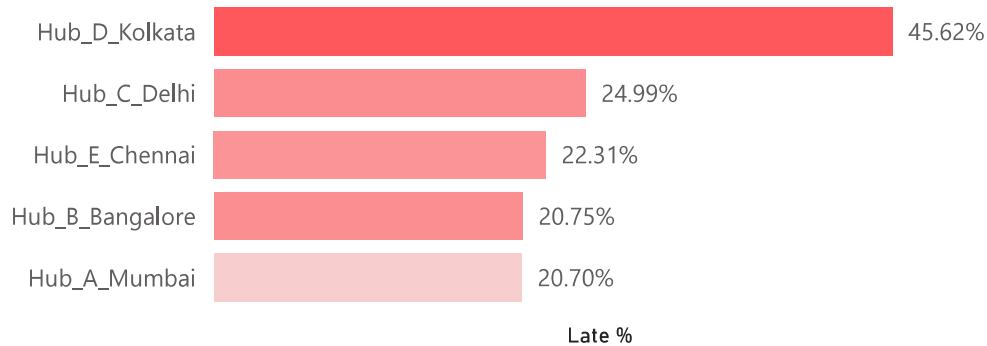

Late Delivery % Trend (Jan–Dec 2024)

Late deliveries stayed steady around 25–28% through most of the year, but spiked sharply to **31.9%** in October — likely driven by festive-season order volume overwhelming **hub capacity**. Deliveries recovered quickly by November, but this pattern suggests the network cannot absorb **demand surges** without a clear operational fix.

Where the Delays Are Coming From

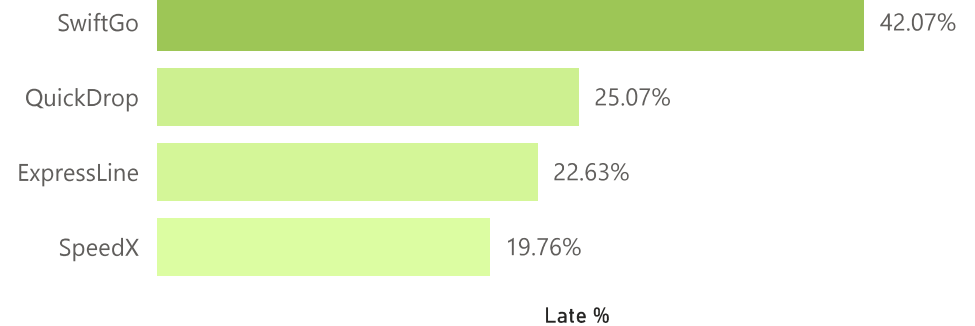

Late Delivery % by Hub

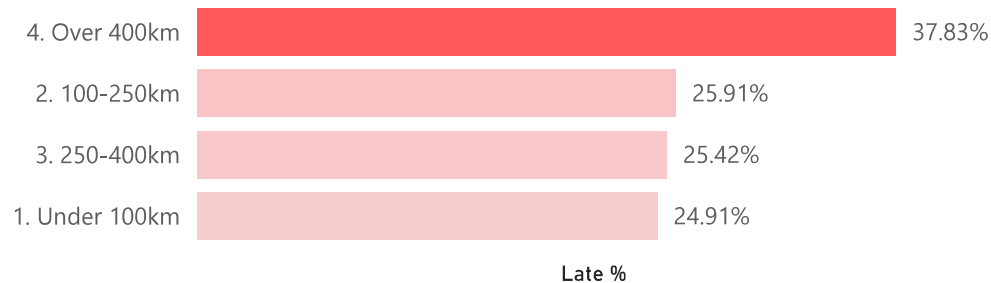

Hub_D_Kolkata is nearly **double** every other hub at 45.6% late — the single biggest hub-level problem.

SwiftGo underperforms every other courier by **17+ points**, late on 42.1% of its deliveries.

Late Delivery % by Courier Partner

Late Delivery % by Distance Band

Orders over **400km** are **~13 points** more likely to be late (37.8%) than any shorter-distance band.

Where to Focus: Priority Hub & Orders

*Hub_D_Kolkata + SwiftGo is the biggest problem — this one combination causes the **most late deliveries** and **costs the most money**. Fixing this pair first and keeping an eye on the high-risk orders below, would stop many delays before they happen.*

Cost Impact by Hub (Ranked)

Hub	Late Orders	Late %	Direct Cost ▼
Hub_D_Kolkata	1006	45.62%	₹1,50,900.00
Hub_C_Delhi	596	24.99%	₹89,400.00
Hub_A_Mumbai	540	20.70%	₹81,000.00
Hub_E_Chennai	538	22.31%	₹80,700.00
Hub_B_Bangalore	496	20.75%	₹74,400.00
Total	3176	26.47%	₹4,76,400.00

Kolkata alone accounts for ~**32% of total delay cost** across all 5 hubs.

Nearly all top-risk orders share the same pattern:
Hub_D_Kolkata + SwiftGo

Top 100 Highest-Risk Orders — Ops Action List

Order id	Hub	Courier Partner	Risk Score ▼
